Latest version always found at www.bache.com/sgml.html

See section for 1.2 info. about "price"

1.1 Introduction

Full-Conversion-Table is a FrameMaker+SGML enhancement, that generates a full conversion table. The current "Generate Conversion Table" command in FrameMaker+SGML only include the used paragraph- and character formats. This is not enough if you want to generate a conversion table for a template, to you can structure a book.

Full-Conversion-Table generates a conversion table that include all the defined paragraph- and character formats.

Notice!   Full-Conversion-Table runs only on PPC or 68K Macintosh machines. Full-Conversion-Table requires FrameMaker+SGML version 5.5 or greater.

Warning!   THE USE OF THIS MODULE IS AT YOUR OWN RISK. IT HAS NOT BEEN TESTED THROUGHLY

1.2 Price

The module is "Helpware". If you find it useful please donate $5 - $10 to your favorite grassroot organization and send a mail to donations@bache.com. Subject: HelpWare. Contents: amount and organization.
